(Comes with Rubber Insert for Textured Tiles)

115mm Diameter

each

### DID YOU KNOW?

Temperature and mixing ratios of water in adhesives and grout can create extremely caustic conditions. This can be up to 30 times more alkaline than a hospital grade cleaner! Wetter mixtures take longer to cure especially in cooler conditions. This extra time and exposure can have a corrosive effect on anodised trims during installation. For best practice consult tech specs of the manufacturer.
